

RAJA MUHAMMAD HASSAN

Software Engineering Student | AI & Automation Enthusiast

Rajahassan4849@gmail.com | 0327-5046694 | Rawalpindi, Pakistan
github.com/RajaMuhammadHassan | linkedin.com/in/raja-muhammad-hassan

CAREER OBJECTIVE

Motivated Software Engineering student with hands-on experience in programming instruction, AI-powered application development, and workflow automation. Skilled at translating complex technical concepts into simple, practical lessons and at building end-to-end projects using modern AI tools. Looking to apply strong problem-solving skills and a growing portfolio of real-world projects toward a career in software development and applied AI.

TECHNICAL SKILLS

- Programming Languages: Python, C++, Java
- Web & UI Prototyping: HTML/CSS, Google Stitch (UI design)
- AI Tools & Platforms: Google Gemini (custom Gems), AI Studio, Prompt Engineering
- Automation: n8n (workflow automation, API integrations, Gmail OAuth)
- Version Control & Collaboration: Git, GitHub (portfolio & project management)

EXPERIENCE

Python Programming Instructor (Freelance / Peer Instruction) 2025 – Present

Delivered via Microsoft Teams

- Designed and delivered a lecture on Python string indexing, slicing, and string functions
- Created professional lecture slides using Gamma for clear, visual teaching delivery
- Simplified core programming concepts for learners at different skill levels

PROJECTS

QuizCraft — AI-Powered Quiz Web App 2026

- Built and deployed an AI-powered quiz application at myquizcraft.ai.studio
- Maintained public source code on GitHub with a professional project structure

Concept Untangler — Custom Google Gemini Gem 2026

- Designed a custom Gemini Gem to break down and explain complex concepts simply

Daily Quote Automation Workflow (n8n) 2026

- Built an automation pipeline using n8n that fetches a daily quote via HTTP Request and emails it automatically using Gmail OAuth
- Currently extending the workflow to use Google Gemini for generating personalized morning greetings

Food Delivery App UI (Google Stitch) 2026

- Designed a multi-screen food delivery app interface, focusing on user flow and clean UI layout

Railway Ticket Booking System (C++) 2026

- Developed a console-based railway ticket booking system with a professional GitHub README

Car Rental Management System (Java Swing) 2025

- Built a desktop GUI application for managing car rental operations using Java Swing

EDUCATION

BS Software Engineering 4th Semester In Progress

National University of Modern Languages (NUML)

Intermediate 2024

502 Model College

Matriculation 2022

502 Model College

CERTIFICATIONS & COURSES

- It Advance
- Ai for Everyone
- English Language(IELTS)
- JavaScript
